

If I Were a Quadrilateral
(to the tune of "The 12 Days of Christmas")

If I were a quadrilateral
A parallelogram I'd be.
With opposite angles equal,
Opposite sides congruent,
And 2 pairs of parallel sides.

If I were a quadrilateral,
A rhombus I would be.
With opposite angles equal,
All sides congruent,
And 2 pairs of parallel sides.

If I were a quadrilateral,
A rectangle I'd be.
With 4 right angles,
Opposite sides congruent,
And 2 pairs of parallel sides.

If I were a quadrilateral,
A square I would be.
With 4 right angles,
All sides congruent,
And 2 pairs of parallel sides.

If I were a quadrilateral,
A trapezoid I'd be.
With 4 sides and angles,
And one pair of parallel sides.
